MASSACHUSETTS WILDLIFE

Vol. LII

No. 1

SPECIAL BioMap ISSUE

Conserving Insects?

2

— by Michael Nelson and Jennifer Loose

If we can protect the most specialized of our native insects through habitat protection and management, we will ensure the survival of almost every other species that lives within their natural communities ...

BioMap: Guiding Land Conservation for Biodiversity in Massachusetts

10

— Andy Finton and Claire Corcoran

Based on decades of rare species and natural community data, BioMap provides a new and essential tool for conserving the native wildlife resources of the Commonwealth ...

Using the BioMap to Protect Biodiversity

22

— by Lynn Harper and Andy Finton

Want to help protect the habitat in your town that's crucial to the perpetuation of biodiversity? Here's advice on how to prioritize conservation efforts and find the resources necessary for success ...

Saving Habitat for Herps

28

— Scott M. Melvin and Suzanne C. Fowle

The rapid decline of many of our native reptiles and amphibians presents conservationists with a host of challenges, not the least of which is that species that live the longest may be the most difficult to save ...

Correspondents, 37

On the Cover: Beauty and biodiversity in abundance are things that Bay State residents have long taken for granted, but retaining our rich natural heritage for future generations in the face of intense development pressures requires public commitment, funding, and the newly created land protection "blueprint" called BioMap featured in this issue.
